

# PNEUMATICS

## PNEUMATICS

Complementing our range of pneumatics accessories we carry the Mindman pneumatics range but have access to all brands and varieties. From simple regulators to valves we are able to fulfill your requirements. Mindman has a wide diversity of products currently include solenoid valves/air control valves, FRL, pneumatic / hydraulic cylinders, and all different kinds of pneumatic power accessories

## PROCESS VALVES

In addition to our Mindman range we also have process valves. There are many different types of valve available including actuated ball valves, butterfly valves, Solenoid valves, angle seat valves and many more. With various types of valves and materials we have we are able to provide solutions for most applications from chemicals to steam to air and to water. From lugged to wafer, from flanged to screwed NCPS have a solution for all needs.

## AIR SYSTEMS

Our air system pipes are made from PE 100 (Polyethylene) which is purpose designed and manufactured in accordance with \*AS4130/AS4131 standards. This type of pipe has no corrosion and is easy to install into a new applications and suitable to extend existing systems.

## PUSHFITS / PUR

At NCPS we keep a large range of different types of pushfits. A simple **PUR**, two-piece compression-style design is reusable and allows for fast, leak-free installations. Both fractional and metric sizes are available in both fittings
