PRESSURE PUMPS

There is a Pressure System to suit virtually every need and budget. There's also a large choice of control options and pump types to suit your application. Proper pump selection is important in order to maximize pump performance, efficiency and service life. For the right pump selection please consult our trained staff.

POOL PRODUCTS

NCPS offers the complete package of pool equipment for your new pool or as a replacement for your existing pool equipment. Davey's extensive range includes a variety of pumps, filters, water sanitising systems, automatic pool cleaners and pool heating equipment.

TRANSFER PUMPS

Transfer pumps can be used in a variety of ways from transferring water from tanks, moving any unwanted water from low lying areas or transferring waste products. These pumps can be setup with automatic float operation for use in pits when they fill or manual operation so output is monitored.

WATER MOVERS

Water mover can be used for many applications. From transferring large amount of water quickly to trash pumps suitable for dirty applications with some solids. How are you protecting what matters most? Be prepared for the fire season with a Fire-fighter pump to protect your property. An Australian made Fire fighter pump can handle tough Australian conditions when you need it most.

12 & 24 VOLT

Impeller pumps are well known for their robust construction, durability, performance and parts availability. We have a wide range of belt, clutch and electric motor driven impeller pumps to suit many applications. Electric diaphragm pumps provide smooth, quiet and reliable delivery of fresh or salt water. The automatic demand feature provides ease of use for galleys, deck wash down, showers and more. Many accessories to suit these pumps are also available

WATER PRODUCTS

INDUSTRIAL PUMPS

We have access to many pumps suitable for all types of industrial applications. From Vertical multistage for large scale pressurised water supply or high flow ISO spec pumps for large irrigation or carrying waste water. Provide us the details of your job and we can find a suitable solution.

DIAPHRAGM PUMPS

Diaphragm pumps are suitable for a large range of liquids. With no impellers to block these pumps are great products with minimal maintenance. They are available in pneumatic, electric, petrol and Diesel drive. These pumps are able to run dry for extended periods without damage.

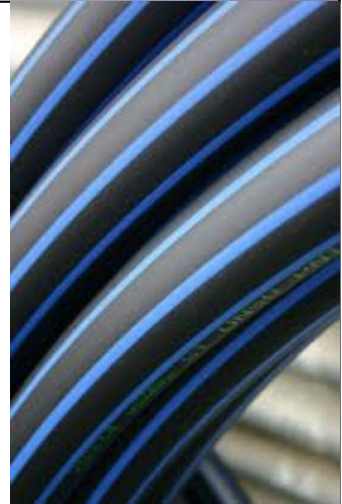

PIPE / FITTINGS / HOSE

At NCPS we have a large range of fittings/ pipe & hose to suit most needs. We carry poly fittings (including compression and threaded) to blue line poly. We also have accessories like cam lock & tank fittings, ball valves, hose clamps, threaded brass, stainless and much more. As well as fittings we also can cater for hosing needs suction and delivery, PVC & rubber.

We can offer solutions and advice to make fitting a new or existing unit, new installations or repairs easy and cost effective.

WATER FILTRATION & TREATMENT

Untreated water can naturally harbor bacteria, viruses and parasites. Bird and animal droppings can also contaminate your water supply with these micro-organisms. Whether your requirement is town or rural supply, ensure your water is safe and visit us to determine what product is suitable for you.

Water quality testing is also available through NCPS Industrial.
