

AIR COMPRESSORS

ATLAS COPCO

NCPS can offer a wide range of oil-injected compressors: from pistons over oil-injected screw compressors, from fixed speed compressors to superior variable speed drive technology.

We offer compressed air solutions for virtually every application and can deliver them, tailored to your exact needs. Our oil-injected compressors are the best choice for all industrial applications requiring high performance, best energy efficiency and premium reliability.

COMPRESSOR OIL

Air compressor oils are specially formulated to protect your piston or rotary screw compressors and neutralize pollution. The correct oil guarantees the longest lifetime, trouble free, with constant performance, at the best operating cost

NCPS INDUSTRIAL

AIR COMPRESSORS

COMPRESSED AIR DRYER AND FILTERS

Untreated compressed air may cause extensive damage and lead to serious performance degradation. To protect your investment, equipment and processes, NCPS can offer a comprehensive line-up of innovative filtration and dryer solutions based on enhanced products and technologies to meet your specific needs.

AIRNET ALUMINIUM AIR PIPE SYSTEMS

AIRNET

Thanks to a smart design and low weight materials, AIRnet can be installed 70% faster than conventional systems.

AIRnet pipes and fittings can be assembled in just a few steps by a single installer, without the need for heavy machinery.

AIRnet pipes and fittings are durable and offer excellent corrosion resistance. Low friction and seamless connections minimize pressure drops.

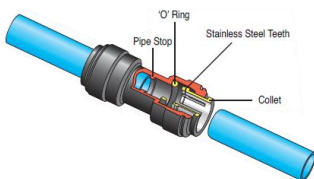

PE100 AIR PIPE SYSTEMS

PE100 high density air pipe is a simple and cost effective system that can be used in many compressed air applications. PE100 (Polyethylene) is purpose designed and manufactured to conform with Australian standards AS4130/4131. This pipe has no corrosion properties and is easy to install into new, adapt onto or extend existing systems.

SPEEDFIT COMPRESSED AIR SYSTEMS

Manufactured to the highest quality in the UK John Guest Speedfit compressed air products are a push-fit system of fittings and nylon pipe which means a compressed air supply can be installed quickly and easily with much reduced down time.
